

Over the past two decades, Dr. Amy Brodsky has earned a reputation as one of the country's foremost rising stars in the dermatological field. Dr. Brodsky is widely recognized as an artist when it comes to understanding facial anatomy and the nuances of treating aging faces. Her cosmetic acumen and early adoption of skincare innovations quickly gained the attention of top media outlets in Chicago, which resulted in ongoing guest appearances on television networks like ABC, NBC, WGN, Fox and The U.

Dr. Brodsky has dedicated her career to the research and practice of innovative dermatologic treatments and the clinical implications of cosmetics. After graduating from the University of Illinois with a degree in bioengineering, Dr. Brodsky attended medical school at The University of Chicago. She distinguished herself early on by winning the Women's Dermatologic Society Fellowship to study clinical trials on Cosmeceuticals before graduating at the top of her class with the highest honors.

Dr. Brodsky earned her certification from the American Board of Dermatology in 2002 and opened her own practice in 2007. She is currently affiliated with Advocate Lutheran General Hospital. Thanks to her widely recognized expertise, she has been invited onto several pharmaceutical advisory boards. In 2012, Dr. Brodsky founded Pediatric Sun Protection Foundation, Inc. (PSPF), a philanthropic endeavor born out of her passion for skin cancer prevention and desire to educate others about effective sun protection for children.

Most recently, Dr. Brodsky founded The Sun Hero Program, and has partnered with Cerave and LaRoche Posay with a mission to raise awareness of the importance of sun safety in childhood, increase adoption of sun safety habits, and to motivate change that will reduce the amount of skin cancer.
